

# SALUTE!

*A glass of wine for me,  
and one for you.*

## Wines of the Villa

At Villa La Madonna we have a great tradition of not only drinking very good wine but actually producing it too. Most of the wine from Villa La Madonna comes from the proud Barbera grapes which we grow around the villa. The grapes you see when you wake up in room 2, 8, and 9, or while taking it easy by the pool, they will be in your glass refined into wine next year. Quite amazing, isn't it?

We have the red wine of the house *The Barbera D'Asti*, our fresh and immensely popular sparkling *Spumante Brut*, the lovely *Rosato*, and last but not least our latest addition to the Villa La Madonna wine family, our sparkling *Rosé, Metodo Classico*. In addition to these wines made of the grapes grown by the villa, we also produce a fresh *Monferrato Bianco* from the local Arneis grape in cooperation with our friend and producer Claudio DaCasto.

## BAROLO

2019

## We cannot talk about this enough...

We never get over the beginning of every new season when we welcome our new Barolo and Langhe Nebbiolo. These premium wines come in a very limited edition exclusively for Villa La Madonna and our guests, made in close collaboration with Mauro Molino winery in La Morra, Barolo. The labels on the bottles are updated every year with exclusive photos by photographer Annica Eklund, one of the owners and founders of Villa La Madonna. Our Barolo 2019 just arrived fresh from the area with the same name, and now we are just waiting for the Langhe Nebbiolo so summer can begin.

As if that wasn't enough, we have a new experiment for the season. A Barbera D'Asti Superiore, aged in wood. We believe this wine will be an amazing complement to our current assortment, specially made for those who want a richer red wine with the nice and smooth Barbera taste intact.

## Ready, set, wine

Spring is a busy time at the vineyard. The vines have been tied up for some time now and they are in beautiful budding. Vittorio, our wine farmer, has also added some new vines to the vine family. Due to some frost at the beginning of April, we expect a slightly smaller harvest than usual this year but imagine the strength in the ones that made it though, they can't be anything but super vines!

## Buy our wine online

Curious about our wines you don't find in the neighbourhood? You know you can buy our wine online! We ship to most European countries and will be happy to deliver home to your doorstep.
